

CE420
Final project execution plan
Nov. 2019
Ben Kepner

For my project I will be building a Persistence of Vision fan. To avoid the use of slip rings or batteries it will be powered by a Qi wireless charging coil. The entire project will be held up with a 3d printed stand, and driven by a brushless motor.

- 8th week:
 - Revision 2 of pcb designed and ordered
- 9th week:
 - Housing designed and printed
 - motor wired and programmed
- 10th week:
 - Final assembly and programing
